CONSUMABLES:

This bin may include stickers. Please use them, but return unused stickers.

This bin may include Paper Plate Fox Mask Template (& spare precut masks). Please return any unused.

This bin may include several "Dig Into Reading" themed snack bags. Please return the unused portion.

The Secret Life of Squirrels

Grades PreK-1

STEM Concept: Spatial Relationships Maps and Positional Words

This Storytime STEM-Pack includes all the materials you need to engage kids in a mathematics activity that addresses the concept of spatial relationships - maps and positional words by navigating and mapping an obstacle course. The activity is launched by reading the popular children's book *The Secret Life of Squirrels* with them, and then setting up and going through an obstacle course, concluding by mapping that obstacle course on a felt board and drawing it on paper. Included in this set, you'll find:

- Detailed instructions (i.e., lesson plan) for the learning activities
- Materials to connect the story to mapping an obstacle course on a felt board (24x24 inch felt board, 8 objects)
- A copy of *The Secret Life of Squirrels* by Nancy Rose

The entire activity takes approximately 45 minutes to complete.

LEAF PRINT DECORATION

Materials: Any solid color paper; small, fresh leaves; an ordinary stamp pad (more than 1 if you would like to print in more than 1 color); plastic wrap; tweezers; scrap paper.

1. Place a leaf on the stamp pad and cover it with a piece of plastic wrap. Gently rub the leaf through the plastic to ink up the leaf.

2. Lift the plastic and remove the leaf with tweezers. Place the leaf, ink side down, on the paper and cover it with a piece of scrap paper. Gently rub the leaf through the paper to print the leaf. Repeat this printing process all over the paper. Print randomly or in an orderly pattern.
