

Craft Stick Connectors Building Set (jumbo crafts sticks, connectors, hinges & binder clips)

Building Brick STEM Challenge Kit (LEGO-like) (brick pieces, instructions and challenge cards)

Give budding engineers a hands-on challenge in physical science! Children select a challenge card, design a solution using the building pieces—and then test their creation. The snap-together pieces make it easy for children to modify the design until it's successful. Plus, the backs of the cards feature building tips and possible solutions—to help children evaluate their work and explore different approaches.
